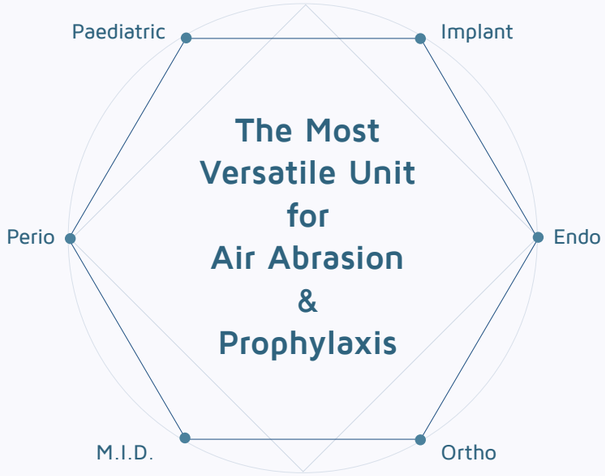
AquaCare

Contactless Dentistry

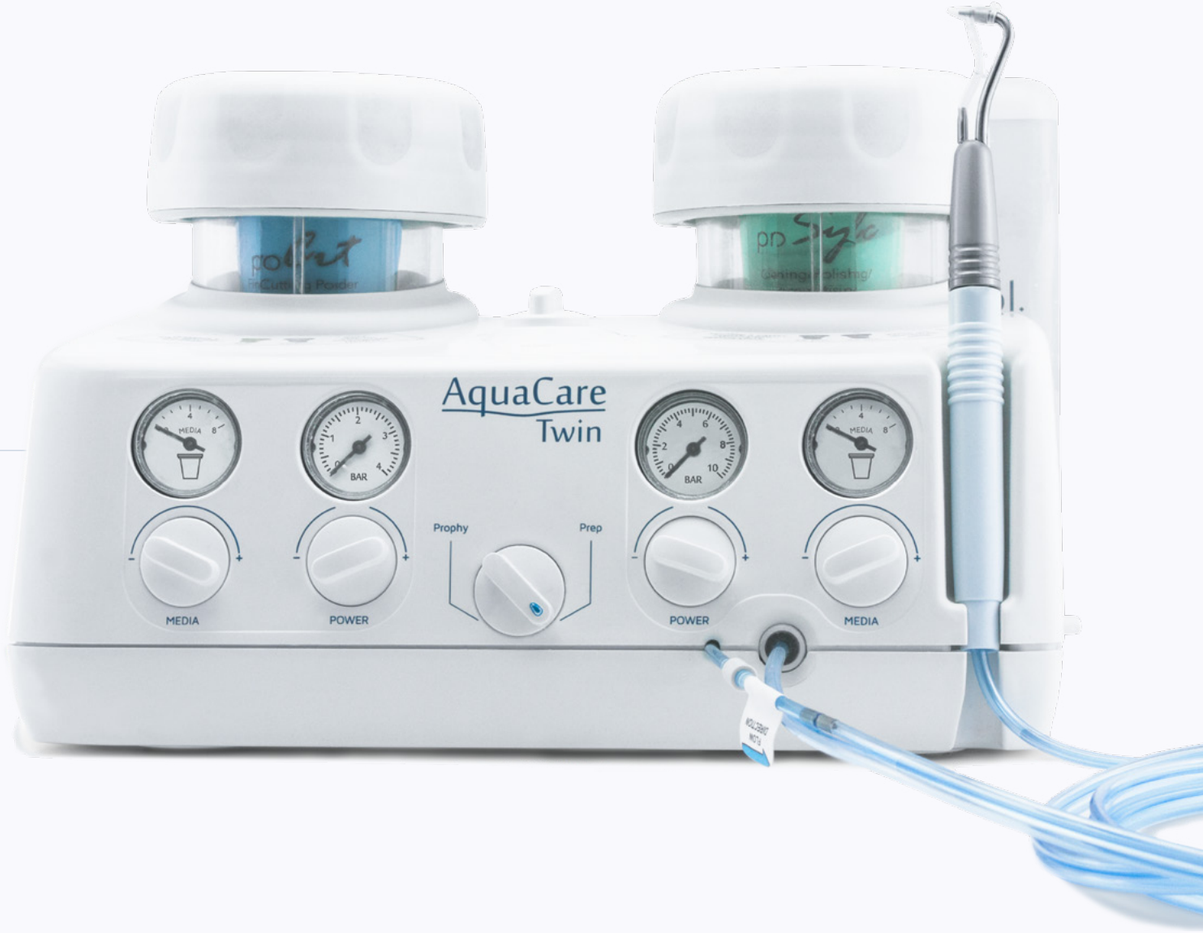
Cleans, Cuts, Prepares - Gently

Contactless Dentistry

- Unlike conventional rotary cutting instruments, the AquaCare handpiece is not in direct contact with the tooth structure, removing only the minimum of sound tooth material and **eliminating the risk of chipping and stress fractures**.
- AquaCare **increases bond strength** with its texturing of the cavity surface.
- **Faster, more efficient cleaning** for removing stains from all tooth aspects, even accessibly difficult pits and crevices, whilst also treating sensitivity. Patients love their brilliant smiles.



- Minimal need for anaesthetics combined with the lack of vibration, heat generation and noise leads to **reduced patient anxiety**. AquaCare is recognised as a practice enhancing product.
- Balanced, slim line **fully autoclavable handpiece** without bulky attachments.
- Incredibly **versatile** across a wide variety of restorative dental procedures.
- Convenient, **easy to use** colour-coded cartridge system makes swapping between types of treatment effortless.

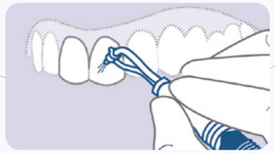


Superior polishing and prophylaxis

ProSylc powered by NovaMin®

- Treatment of dental hypersensitivity.
- Fast removal of extrinsic stains, e.g. coffee, tea, tobacco.
- Plaque removal prior to fluoride treatments.
- Pre and post whitening treatments.

CLEANING



Angle 45°. Approx. 4mm
away from the surface.

Use AquaCare before scaling to remove stubborn plaque and decay quickly, leaving only very tough calculus for removal with a scaler.

ProClean for Sodium Bicarbonate

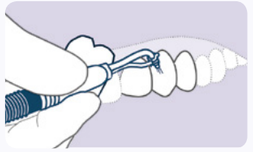
- Fast stain removal with no patient discomfort.

Superior Abrasion & Preparation

ProCut 29µ & ProCut+ 53µ Aluminium Oxide

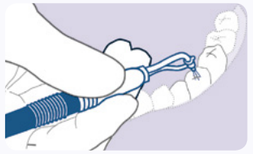
- Roughening of surface in preparation for adhesive dentistry.
- Prevention of micro-fractures and crazing normally associated with rotary instrumentation.
- Opening and clearing of fissures.
- Enhanced sealant retention.
- Removal or repair of composite restorations.
- Cavity preparations for composite restorations and small amalgams.
- Preparation of small carious lesions.

BONDING / PREPARATION



Angle 35-45°. Approx. 2-3 mm
away from the surface.

BONDING / PREPARATION



Angle 45°. Approx. 2mm
away from the surface.

- Matting the surface of metallic restorations for detection of interferences.
- Remove cement from crowns, bridges and brackets.

AquaCare Twin

It's a Treatment Centre

- Designed to deliver abrasion and prophylaxis, the AquaCare Twin Treatment Centre empowers the clinician to switch easily between dental procedures.
- Pressure and media settings do not need adjusting for differing treatments.
- Enjoy the finesse required in multi-disciplinary treatments.

AquaSol
500ml

4-in-1 Handpiece

cut | clean | wash | dry

- 'Venturi' design blockage free tip.
- Intuitive, easy-to-use power, fluid and media controls.
- Ultra-lightweight [less than 30g] fully autoclavable handpiece.
- 0.6mm and 0.8mm handpiece options.
- Single patient disposable nozzle and tube.
- Intelligent 3-position foot control delivering:

air | air + solution | air + solution + power

AquaCare

Contactless Dentistry

A comfortable and quick cleaning procedure for even brighter and cleaner teeth

velopex INTERNATIONAL

AquaCare

AquaCare uses breakthrough technology to deliver a comfortable, quick cleaning procedure by using a fine stream of fluid combined with a tiny volume of powder directed at the teeth to be treated. Decay is then comfortably removed with minimal sensation, leaving healthy tooth material undisturbed.

AquaCare Patient Leaflet designed to make it easy for you to explain the benefits of air polishing to your patients. Find out more at velopex.com or call us on +44 (0)20 8965 2913
