WEL Recommended Limits: 10mg/m³ (total dust) (8hr TWA)
4mg/m³ (respirable dust) (8hr TWA)

DNEL_{Long-term} - After assessment of the physiochemical, toxicokinetic and physiological role of sodium bicarbonate, a DNEL_{Long-term} derivation is considered unnecessary.

DNEL_{Acute} - sodium bicarbonate is considered to be of no toxicological concern, in acute studies no local irritation was noted. A DNEL_{Acute} derivation is considered unnecessary.

PNEC - The lowest L(E)C₅₀ value is > 100 mg/l (48-h EC₅₀ with Daphnia magna is 3,100mg/l) and the lowest chronic value is > 0.1 mg/l (21-d NOEC with Daphnia magna is >576 mg/l). Therefore, sodium bicarbonate is not classified according to EU Directive 67/548/EEC or EU Classification, Regulation, Labelling and Packaging of Substances and Mixtures (CLP) Regulation (EC) No. 1272/2008.

8.2 Exposure controls

Appropriate engineering controls

If user operations generate dust, use process enclosures, local exhaust ventilation, or other engineering control to maintain airborne dust levels below recommended exposure limits.

Personal protection

Eye/face protection

In case of contact with the eye, wear eye/face protection rated to protect eyes against dust (EN 166) eg. safety eye shields with dust protection, goggles or face visor.

Hand protection

Wear suitable protective gloves for frequent or prolonged contact.

Skin/body protection

No special protective equipment required

Respiratory protection

In the case of high dust levels wear suitable respiratory protective equipment e.g. dust mask or respirator, that conform to national/international standard, EN143. Recommended filter type P2.

Environmental exposure controls

Contain any spillage

Avoid discharges to the environment

Dispose of any rinse water in accordance with local and national regulations
